## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 34-58 are rejected under 35 U.S.C. 102(e) as being anticipated by Desai et al., U.S. Pre Grant Publication 2002/0025414.

Desai discloses a material that contains up to 100% recycled material (see paragraph 0006).

Additionally, the reference discloses that the recycled material contains at least one type of thermoplastic material and that the recycled material is obtained from post-consumer products such as waste carpet (see paragraph 0024). Paragraph 0025 of the reference discloses that the backing material is a thermoplastic material and can be polyvinyl chloride and have polyethyelene. Desai also discloses that an alkyl phthalate plasticizer (Santicizer Registered™ 160) is present in the matrix/backing material (see paragraph 0026). It is disclosed in paragraph 0032 that the waste carpet is cut up to form pieces with a length of 1/4" to 1/2". Also, it is disclosed in paragraph 0035 that the recycled matrix also comprises face fibers such a polyester fibers dispersed therein. Paragraph 0036 of the Desai reference discloses that the recycled material can be used in any combination with virgin thermoplastic material such as from about 1% weight recycled material to about 100% recycled material alone with about 0% virgin material to about 100% virgin material.
